Cristobal A. Lizarraga

(480)- 519-3666 Lizarraga.cristobal689@gmail.com

Education

M.S. Computer Science, Arizona State University, May 2024
GPA: 3.89

B.S. Computer Science, Arizona State University, May 2023
GPA: 3.96

Skills

Software: AWS, MySQL, PostgreSQL, Tableau, VMware, Git/GitHub, Node.js, React, Blender, MATLAB, Photoshop, Unity, Salesforce, ServiceNow, AutoCAD, Unix/Linux
Programming Skills: Java, Python, C/C++, JavaScript, SQL, Bash, C#, TensorFlow, Hadoop, Spark, D3.js, NoSQL, Scala, HTML, React, Node.js, PHP, PowerShell, Shell Scripting, Arduino, Apex, Prolog, Scheme, LISP
Languages: English (Native), Spanish (Fluent)

Work Experience

ServiceNow Intern - Keenstack **May 2026 - Present**

- Gaining hands-on experience with ServiceNow platform configuration and administration at a ServiceNow consulting firm specializing in AI-driven customer service, employee workflow automation, and IT operations optimization.
- Developing skills in leveraging AI tools within ServiceNow to enhance service delivery and streamline enterprise workflows.
- Pursuing ServiceNow Certified System Administrator (CSA) certification.

Drafter-Phoenix Modulars **January 2025- Present**

- Design and develop detailed blueprints for modular buildings using AutoCAD Architecture, customized to meet client specifications and project goals.
- Collaborate with cross-functional teams—including sales, structural engineers, and production staff—to ensure accurate, buildable designs.
- Verify all drawings comply with state and local building codes across multiple jurisdictions, revising plans as needed to meet regulatory standards.
- Created custom AutoLISP scripts to automate repetitive drafting tasks and improve workflow efficiency.

Research Assistant (Fellowship) - Arizona State University **August 2022-April 2023**

- Built data pipelines and managed large datasets for SEIR models and COVID-19 research, including data extraction, transformation, and integration.
- Designed visualizations to analyze prevention strategies and support educational materials.

Projects

Vast Challenge

- Visualized daily routines using city-scale datasets to uncover patterns via data modeling and visual tools.
- *Tech:* JavaScript, D3.js, Apache Spark, Python, SQL

AR NASA SpaceCraft Museum Model (CS Capstone Project)

- Working with a team, developed an interactive AR model of NASA's Psyche spacecraft

for educational use in museum web apps.
- *Tech:* JavaScript, Blender, Google ARCore, AR.js, Three.js, HTML/CSS

Child Mind Institute- Detecting Sleep States
- Analyzed pediatric sleep data using models from logistic regression to LSTM networks to identify behavior patterns.
- *Tech:* Python, Matplotlib, Pandas, NumPy
